

**Computer Science Project
On
Airline Ticket Management with Python**

**Submitted by:
SAMEER VERMA
XII A**

**Submitted to:
Mr. Navjyot Singh Duggal**

Eram Public College
Indira Nagar, Lucknow
Uttar Pradesh

Certificate

This is to certify that **SAMEER VERMA**, a student of Class XII-A, Eram Public College, Lucknow, Uttar Pradesh, has successfully completed the project titled "**Airline Ticket Management System**" under the guidance of **Mr. Navjyot Singh Duggal**.

He has demonstrated sincere effort, keen interest, and dedication in the completion of this project. The work submitted is in accordance with the guidelines prescribed by **CBSE, New Delhi**, for the academic session **2023–2024**.

ACKNOWLEDGEMENT

We would like to express our sincere and heartfelt gratitude and appreciation to all the individuals who helped us in successfully completing this project report on “**Airline Ticket Management System**” within the limited time frame.

I would like to take this opportunity to express my heartfelt gratitude to **Mr. Navjyot Singh Duggal**, my respected Computer Science teacher and project guide, for his unwavering support, expert guidance, and constant encouragement throughout the duration of this project. His deep knowledge of the subject and ability to explain complex concepts with clarity greatly enhanced my understanding and helped shape this project into its final form. His mentorship has not only enriched my technical skills but also inspired me to strive for excellence.

I would also like to extend my sincere thanks to all my classmates and peers for their collaboration, and the positive learning environment along with healthy criticism. The journey of working on this project was made more meaningful through the shared experiences, discussions, and mutual support.

Lastly, I express my gratitude to **Eram Public College** for providing the necessary resources and an academic environment conducive to learning and growth. This project has been an invaluable part of my educational journey, and I am truly grateful for everyone who contributed to its success.

Thank you all for making this assignment a fulfilling and rewarding experience.

HARDWARE AND SOFTWARE REQUIREMENT

1) HARDWARE

- PC

2) SOFTWARE

- PYTHON (latest version of IDLE or any other development suite)
- MYSql Python Connector
- MySQL(v 8.0 or above)

About

My project on Airline ticket management system is all about booking tickets, viewing updates on reservation of the ticket booked in an online manner. The project simplifies the operation to a significant extent. Although the operations done are identical to railway or bus reservation, it familiarizes the user with the backend working of the system that is facilitating him/her. Almost all the operations are included in this project barring ticket cancellation.
